

Don't allow your dreams to retire

Senior Living Redefined !!

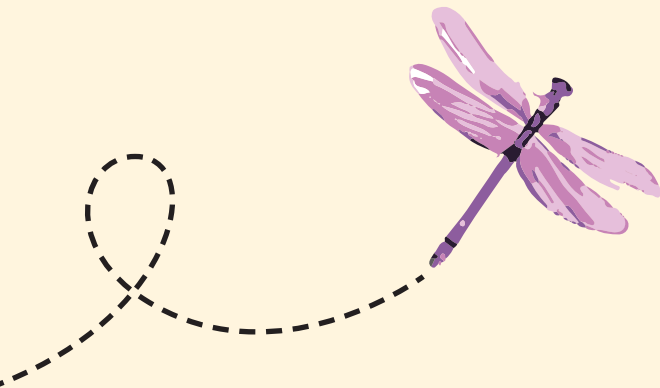

Live in a world of tranquility

Thanks to the rapid advancement of science, life expectancy has leap frogged over the last decade leaving us with a large ageing population. Our value system over the years have eroded leaving a vacuum in the concept of elderly care. Fiercely independent parents and disinterested children have become the order of the day. Hence we felt that a unique project with only the elderly in mind needs to be conceived and we came up with TAPOVAN SOLACE. During our research we critically examined the set up and working of similar facilities and took a lot of feed back from the users.

The elderly population are uncomfortable when they are isolated from regular society and kept away in distant facilities. They get their peace and tranquility there but feel fully disconnected from regular society. Psychologists have proved that they require to be amidst all age groups and see the propagation of fresh life. This prompted us to come up with this project well within city limits. The project consists of partially furnished apartments, that have been specifically designed for the elderly.

The units are designed to accommodate a couple in comfort and the minimum age of one of the occupants has to be 55 years. The project is fully serviced and maintained like a 3 star facility. A fully equipped and well staffed kitchen will provide freshly cooked vegetarian meals thrice a day and provide for beverages and snacks during the rest of the day. use of the community dining facility is optional as residents are free to cook their meals in their own kitchens. House keeping facility within the apartment is available on request. Lots of activities will be planned during the day to keep the residents busy.

An in house secretarial assist centre is available to help you in various transactions and also for your communication needs. All the individual units are connected to a central control station via intercom and alarm buttons to ensure prompt response in times of emergencies. The in house dispensary will have a doctor on call with para medics available round the clock, the services of a dedicated ambulance is also available in-house.

Tapovan Projects

Tapovan Projects commenced operations as M/S Enclaves Infrastructure – a company that has executed many landmark projects like Tapovan, Tapovan Terraces, and Tapovan Greens.

At the heart of our business lies a basic concept – to bring a human element to real estate. Over the years, this vision has become an integral part of every project we have undertaken.

At Tapovan, customer satisfaction is what drives our business. We design spaces of the highest quality with an aesthetic touch to give you the best in real estate.

As a professional firm, our projects look beyond the conventional; exploring uncharted territory to design spaces that enhance your standard of living.
